### FROM CHAIRMAN'S DESK

**Hon. Shri. Bhausaheb A. Rupnar**  
**Chairman**

I would like to congratulate and welcome our College's budding pharmacists to the world of a rewarding career. I'm delighted to know that FES, Fabtech College of Pharmacy in Sangola, is releasing its Bimonthly Fourteenth Fabtech Pharma Newsletter. Undoubtedly, the college newsletter will contribute in the promotion of the college's multiple activities. It acts as a showcase for the faculty's achievements and successes in the classroom. This strengthens the documentation culture at the institute. It also facilitates the development of teamwork, which is essential in today's competitive global environment. I hope that this tradition of sending out newsletters continues indefinitely. We educate in a unique and creative way, and our students learn in a unique and creative way. Today's pupils have a strong knowledge base and adaptability. I am confident that this will keep the pupils updated about the advancements and challenges they will encounter in the near future. This has been a watershed moment for our programme, and we are grateful for your continued support and efforts on behalf of our students. I wish all the best to the incoming Fabtech College of Pharmacy, Sangola. Pharmacists who are ready to make their mark in the pharmacy profession.

**FROM MANAGING DIRECTOR'S DESK**

**Hon. Dr. Ameet B. Rupnar**  
Managing Director

I'd like to express my gratitude to Fabtech College of Pharmacy for producing this Fourteenth Fabtech Pharma newsletter. Beyond academics, it has made a name for itself among Pharmacy Colleges in the community by hosting, participating in, and organising seminars, workshops, placement exercises, health awareness campaigns, and blood donation camps, among other things. The efforts of good administration, dedicated teaching faculty, quality students, and a broad foundation of sophisticated instruments, an enlarged library, and an educationally supportive environment are undoubtedly responsible for this accomplishment. It serves as a showcase for the faculty's accomplishments and accomplishments in the classroom. This improves the institute's documentation culture. I warmly welcome you to explore this Fabtech Pharma Newsletter and make a visit to our college campus to get a feel of our vibrant academic atmosphere.

**FROM CAMPUS DIRECTOR'S DESK**

**Hon. Dr. Sanjay N. Adate**  
Campus Director

I'd like to congratulate Fabtech College of Pharmacy, Sangola on this Fourteenth Bimonthly Fabtech Pharma Newsletter work, theory, practical, seminar presentations, and research projects are all part of the Pharmacy curriculum. Aside from academics, students are also involved in cultural and sporting activities, as well as different competitions and social activities. I am delighted to present the Fourteenth Bimonthly Fabtech Pharma Newsletter, and best wishes for the newsletter's continued success.

**FROM PRINCIPAL'S DESK**

**Prof. Dr. S.K. Bais**  
Principal

The News Letter is a source of great pride and satisfaction for FES, Fabtech College of Pharmacy, Sangola. The College has made significant success in all academic and non-academic areas, as well as capacity building for staff and students. I am confident that this edition of Fabtech Pharma Newsletter will send a positive message to staff, students, and others interested in technical education and technology-based activities. A News Letter is similar to a mirror in that it displays a clear picture of all of a college's activities and helps students and teaching faculty strengthen their writing skills. I appreciate the Editorial Board of this News Letter for their hard work and efforts in completing the work in record time. Also, please accept my deepest congratulations to the staff and students for their successful efforts with Best Wishes.

**EDITORIAL TEAM**

**Dr. Prof. S.K. Bais**

**FROM EDITORS DESK**

The editorial team has the honour of releasing the Fourteenth FES Fabtech College of Pharmacy, Sangola. Fabtech Pharma Newsletter. A newsletter, as we all know, reflects a college's vision and objectives. It also highlights upcoming events, activities, and academic progress. We express our heartfelt gratitude to our management and principal for their great support, as well as their permission to publish the newsletter. Many more people, including students, are encouraged to use this newsletter as a platform to exhibit their ideas.

## LEADING ARTICLE

### Leprosy - Hansen's Disease (Mycobacterium leprae)

#### Leprosy?

Leprosy is an ancient disease of mankind that has persisted for generations across various continents. The disease is caused by *Mycobacterium leprae* and *Mycobacterium lepromatosis* with humans acting as the natural reservoir. The bacterium is non-motile, measures 4-7  $\mu$ m long and can only be cultured on Mouse paw pads or the nine-banded Armadillo (*Dasypus novemcinctus*). *M. Leprae* grows slowly, and aided by very low temperatures, it only divides once every twelve days. The transmission of Leprosy is still poorly understood; however, it is widely accepted that the inhalation of aerosol droplets from cases with high mycobacterial loads is the most common mechanism. Leprosy affects the skin and peripheral nerves and has been a focus of a worldwide eradication campaign by the World Health Organization which has been largely successful.

#### History of Leprosy

Ancient writings report evidence of leprosy at various times in history in India, China and the middle east, prominent amongst which include the Sushruta Samhita; 600 BC which is widely believed to provide the first clear written description of the disease.

The 19th and 20th centuries saw breakthroughs, with the discovery of the causative organism of leprosy through the visionary work of Armauer Hansen being chief amongst them. It is generally believed that Hansen observed the leprosy bacillus in 1873 and documented this in a communication to the Norwegian Medical Society, which was published in 1874. Thus, Hansen became the first to suggest that a specific microbe caused a chronic disease.

Three other significant achievements in the history of leprosy include initial use of sulfone therapy by Dr. Guy Faget of Carville in 1941; discovery that the mouse footpad supported the multiplication of *M. leprae* by Dr. Charles Shepard of the Centre for Disease Control in 1959; and the demonstration that the nine-banded Armadillo is highly susceptible to developing disseminated Hansen's disease after inoculation with the *M. leprae* by Dr. Waldemar Kirchheimer of Carville and Dr. Eleanor Storrs of the Gulf South Research Institute in 1968.

In the 1960s, rifampicin and clofazimine were discovered and added to the treatment regimen labelled as multi-drug therapy and recommended by the WHO in 1981.

The introduction of Multi Drug Therapy (MDT) worldwide in 1982 by the World Health Organization in response to rising number of dapsone-resistant cases of leprosy was monumental in reducing the number of new leprosy cases worldwide from 5.4 million in the early 1980s to 0.21 million cases in 2014. The efficacy of the new MDT approach encouraged the World Health Organization to develop a strategy to eliminate leprosy as a public health problem by 2000.

## Transmission of Leprosy

Despite Leprosy being an age-old disease, there is still a poor understanding of its transmission routes. The skin and the upper respiratory tract are the most likely routes, with research favouring the upper respiratory tract. It is suggested that aerosol droplets from humans with leprosy can be inoculated onto the nasal mucosa of healthy individuals leading to a local infection and subsequent dissemination just like the case with tuberculosis. Prolonged skin to skin contact can also lead to transmission especially when contact has been with a case of Lepromatous leprosy due to the high levels of *M. Leprae* in the superficial dermis of these patients. There have been cases from accidental needle injuries and tattooing. There are also reports of transmission from direct or indirect contact with the nine-banded Armadillo.

The incubation period of *M. Leprae* varies especially in endemic areas; the average incubation period is between three years and ten years. This has been estimated from observational studies as there are no accurate immunological tests to identify the latent phase of the infection. There have been cases of Leprosy in infants just a few weeks old and in veterans decades after exposure. In some endemic areas a considerable percentage of the population may be infected and remain asymptomatic, with a large proportion having spontaneous resolution in early phases of the disease. One major factor determining disease manifestation is the immune status of the exposed individual.

## Pathogenesis of Leprosy

*Mycobacterium Leprae* mainly infects macrophages and Schwann cells leading to demyelination, loss of axonal conductance and nerve injury. The bacteria infect the Schwann cells via a laminin binding receptor in addition to PGL1, a conjugate protein. Studies have also shown that *M. Leprae* targeted SC receptor, dystrophin may also play a role in the binding of *M. Leprae*. Thereafter, there is a direct bacterial ligation to neuregulin receptor, ErbB2 and Erk1/2 activation, and subsequent MAP kinase signalling and proliferation leading to demyelination. Cutaneous and mucosal involvement occur due to infection of histiocytes and keratinocytes.

## The burden of Hansen's Disease

According to CDC statistics, these results were obtained:

- The number of new cases reported globally to (WHO) in 2019 was more than 200,000.
- Close to 15,000 children were diagnosed with Hansen's Disease in 2019, more than 40 a day.
- An estimated 2 to 3 million people are living with Hansen's Disease-related disabilities globally.
- In 2019, the countries with the highest number of new diagnoses were India, Brazil, and Indonesia.
- Over half of all new cases of Hansen's disease are diagnosed in India, which remains home to a third of the world's poor, a group disproportionately affected by the disease.

## Sign and Symptoms

Symptoms mainly affect the skin, nerves, and mucous membranes (the soft, moist areas just inside the body's openings).

### The disease can cause skin symptoms such as:

- A large, discoloured lesion on the chest.
- Discoloured patches of skin (lighter than the skin around).
- Growths (nodules) on the skin.
- Thick, stiff or dry skin.
- Painless ulcers on the soles of feet.
- Painless swelling or lumps on the face or earlobes.
- Loss of eyebrows or eyelashes.

### Symptoms caused by damage to the nerves are:

- Numbness of affected areas of the skin.
- Muscle weakness or paralysis (especially in the hands and feet).
- Enlarged nerves (especially those around the elbow and knee and in the sides of the neck).
- Eye problems that may lead to blindness (when facial nerves are affected).

### Symptoms caused by the disease in the mucous membranes are:

- A stuffy nose
- Nosebleeds

## Treatment of Leprosy

The treatment of leprosy, with curative intent, involves the use of multi-drug therapy which includes a combination of rifampicin, dapsone and clofazimine. This combination of multiple drugs is intended to prevent the development of resistance which occurs with monotherapy as was demonstrated by resistance to dapsone when it was initially used as monotherapy. The WHO first published guidelines for the treatment of leprosy using multi-drug therapy in 1982, as a response to the increasing reports of dapsone resistance. The treatment guidelines recommended using combination of the above named three medications depending on whether treatment was for paucibacillary or multibacillary leprosy.

For Paucibacillary leprosy, Rifampicin and dapsone were used for 6 months, while Multibacillary leprosy was treated for 2 years by adding clofazimine to rifampicin and dapsone. Further guidelines published in 1998, changed the duration of treatment of multibacillary leprosy to 12 months while keeping the medications unchanged.

The most recent WHO guidance published in 2018 now recommended a change to the treatment of paucibacillary leprosy. The guidelines now are that paucibacillary leprosy is treated with 3 medications (rifampicin, dapsone and clofazimine) for 6 months, in contrast to the previous 2 medications as detailed above. Thus, with the most recent changes, both forms of leprosy are treated with 3 medications with the only difference being the duration of therapy. The above WHO guidance differs from that used by the National Hansen disease programme in the United States which advocates for longer treatment. It recommends Rifampicin and dapsone for 12 months for 24 months for MB leprosy.

## MDT Regimens

Each blister pack contains treatment for 4 weeks.

**PB adult treatment:**

- Once a month: Day 1
  - 2 capsules of rifampicin (300 mg X 2)
  - 1 tablet of dapsone (100 mg)
- Once a day: Days 2-28
  - 1 tablet of dapsone (100 mg)

Full course: 6 blister packs

PB adult blister pack

**MB adult treatment:**

- Once a month: Day 1
  - 2 capsules of rifampicin (300 mg X 2)
  - 3 capsules of clofazimine (100mg X 3)
  - 1 tablet of dapsone (100 mg)
- Once a day: Days 2-28
  - 1 capsule of clofazimine (50 mg)
  - 1 tablet of dapsone (100 mg)

Full course: 12 blister packs

MB adult blister pack

It is crucial that patients understand which drugs they have to take once a month and which every day.

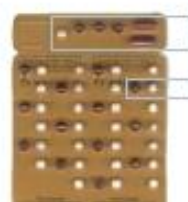

**PB child treatment (10-14 years):**

- Once a month: Day 1
  - 2 capsules of rifampicin (300 mg+150 mg)
  - 1 tablet of dapsone (50 mg)
- Once a day: Days 2-28
  - 1 tablet of dapsone (50 mg)

Full course: 6 blister packs

For children younger than 10, the dose must be adjusted according to body weight.

PB child blister pack

**MB child treatment (10-14 years):**

- Once a month: Day 1
  - 2 capsules of rifampicin (300 mg+150 mg)
  - 3 capsules of clofazimine (50 mg X 3)
  - 1 tablet of dapsone (50 mg)
- Once a day: Days 2-28
  - 1 capsule of clofazimine every other day (50 mg)
  - 1 tablet of dapsone (50 mg)

Full course: 12 blister packs

For children younger than 10, the dose must be adjusted according to body weight.

MB child blister pack

For rifampicin-resistant leprosy, the guidelines recommend treatment with at least two second-line drugs (clarithromycin, minocycline or a quinolone) plus clofazimine daily for 6 months, followed by clofazimine plus one of these drugs for an additional 18 months. When ofloxacin resistance is also present, a fluoroquinolone should not be used as part of second-line treatment. The regimen of choice in such cases should consist of 6 months of clarithromycin, minocycline and clofazimine followed by clarithromycin or minocycline plus clofazimine for an additional 18 months.

## ACADEMIC ACTIVITIES

### **Overall syllabus completion and attendance of B. Pharm-I year, Sem-I Students**

The Overall 100% Syllabus of Theory and Practical subjects like Human Anatomy and Physiology-I, Pharmaceutical Analysis-I, Pharmaceutics-I, Pharmaceutical Inorganic Chemistry, Communication skills, Remedial Biology/Remedial Mathematics of B. Pharm-I, Sem-I, was completed by the faculty members with 90% attendance of students for the Theory classes and Practical.

### **Conducted End Semester Theory and Practical Examination of B. Pharm -I Year, Sem-I**

As per Time-Table given by Dr. Babasaheb Ambedkar Technological University, Lonere. The Fabtech College of Pharmacy, Sangola was conducted the End Semester Theory and Practical examination from 02/01/2024 to 18/01/2024.

### **Overall syllabus completion and attendance of B. Pharm-II year, Sem-III Students**

The Overall 100% Syllabus of Theory and Practical subjects like Pharmaceutical Organic Chemistry II, Physical Pharmaceutics-I, Pharmaceutical Microbiology, Pharmaceutical Engineering of B. Pharm-II, Sem-III, was completed by the faculty members with 85% attendance of students for the Theory classes and Practical.

### **Conducted End Semester Theory and Practical Examination of B. Pharm -II Year, Sem-III**

As per Time-Table given by Dr. Babasaheb Ambedkar Technological University, Lonere. The Fabtech College of Pharmacy, Sangola was conducted the End Semester Theory and Practical examination from 02/01/2024 to 18/01/2024.

### **Overall syllabus completion and attendance of B. Pharm-III year, Sem-V Students**

The Overall 100% Syllabus of Theory and Practical subjects like Medicinal Chemistry-II, Industrial

Pharmacy-I, Pharmacology-II, Pharmacognosy and Phytochemistry-II, Pharmaceutical Jurisprudence of B. Pharm-III, Sem-V, was completed by the faculty members with 80% attendance of students for the Theory classes and Practical.

### **Conducted End Semester Theory and Practical Examination of B. Pharm -III Year, Sem-V**

As per Time-Table given by Dr. Babasaheb Ambedkar Technological University, Lonere. The Fabtech College of Pharmacy, Sangola was conducted the End Semester Theory and Practical examination from 02/01/2024 to 18/01/2024.

### **Overall syllabus completion and attendance of B. Pharm-IV year, Sem-VII Students**

The Overall 100% Syllabus of Theory and Practical subjects like Instrumental Methods of Analysis, Industrial Pharmacy-II, Pharmacy Practice, Novel Drug Delivery System of B. Pharm-IV, Sem-VII, was completed by the faculty members with 80%.

### **Conducted End Semester Theory and Practical Examination of B. Pharm-IV year, Sem-VII Students**

As per Time-Table given by Dr. Babasaheb Ambedkar Technological University, Lonere. The Fabtech College of Pharmacy, Sangola was conducted the End Semester Theory and Practical examination from 02/01/2024 to 18/01/2024.

### **Overall syllabus completion and attendance of D. Pharm-I year Students**

The Overall 60% Syllabus of Theory and Practical subjects like Pharmaceutics, Pharmaceutical Chemistry, Pharmacognosy, Human Anatomy and Physiology and Social Pharmacy of D. Pharm-I year, was completed by the faculty members with 85% attendance of students for the Theory classes and Practical.

## Conducted Second Sessional Theory and Practical Examination of D. Pharm -I Year, Students

As per dates given in the Academic calendar provided by MSBTE, Mumbai, The Fabtech College of Pharmacy, Sangola was conducted the Second Sessional Theory and Practical examination from 08/01/2024 to 20/01/2024.

## Overall syllabus completion and attendance of D. Pharm-II year Students

The Overall 60% Syllabus of Theory and Practical subjects like Pharmacology, Biochemistry, Community Pharmacy and Management, Pharmacy law and Ethics, Hospital and Clinical Pharmacy and Pharmacotherapeutics of D. Pharm-II year, was completed by the faculty members with 80% attendance of students for the Theory classes and Practical.

## Conducted Second Sessional Theory and Practical Examination of D. Pharm -II Year, Students

As per dates given in the Academic calendar provided by MSBTE, Mumbai, The Fabtech College of Pharmacy, Sangola was conducted the Second Sessional Theory and Practical examination from 08/01/2024 to 20/01/2024.

## COLLEGE ACHIEVEMENT

### Fabtech College of Pharmacy, Sangola accredited by an ISO 9005:2015 Quality Management System

Fabtech College of Pharmacy, Sangola accredited by an ISO 9005:2015 Quality Management System. This award was announced by Royal Assessment Pvt. Ltd. The infrastructure, educational methods, curriculum, emphasis on student employability skill development, job opportunities through college, focusing on sports, e-learning facility, pharmacy laboratory, as well as separate classrooms for personality development, well-equipped computer room and library and other physical facilities and educational quality were evaluated by RAPL.

The ISO rating received by this college is another mark of honour in the structure of the institution. It has to be said that, this accreditation means another acknowledgment of the socially useful work done by, Late. Hon. Birasaheb Rupnar, Founder President of Fabtech Education Society's, Sangola.

Hon. Shri. Bhasaheb Rupnar Chairman, Fabtech Technical Campus, Sangola, Hon. Shri. Dr. Ameet Rupnar, Managing Director, Fabtech Technical Campus, Sangola, Hon. Shri. Dinesh Rupnar, Executive Director, Fabtech Technical Campus, Sangola and Hon. Shri. Dr. Sanjay Adate, Campus Director, Fabtech Technical Campus, Sangola congratulated Principal and all teachers and non-teaching staff and wished them all the best for the future.

## STAFF ACHIEVEMENT

### Prof. Sarfaraz M. Kazi of Fabtech College of Pharmacy, Sangola conferred Doctoral Degree in Pharmaceutical Chemistry

Mr. Sarfaraz M. Kazi, Professor, Department of Pharmaceutical Chemistry in Fabtech College of Pharmacy, Sangola was recently awarded by Doctorate Degree of the Shri. Jagdish Prasad Zambarmal Tibrewa University, Rajasthan. He has presented a thesis on “Evaluation of Potentially Hazardous Contaminants in Unregistered Herbal Products Used in Clinical Practice”.

In this research, he made a deep study and presented a thesis on the fact that some herbal medicines prepared by Ayurvedic doctors themselves and given to mutual patients are not verified according to the guidelines of the World Health Organization.

Hon. Shri. Bhausaheb Rupnar Chairman, Fabtech Technical Campus, Sangola, Hon. Shri. Dr. Ameet Rupnar, Managing

Director, Fabtech Technical Campus, Sangola, Hon. Shri. Dinesh Rupnar, Executive Director, Fabtech Technical Campus, Sangola and Hon. Shri. Dr. Sanjay Adate, Campus Director, Fabtech Technical Campus, Sangola, Prof. Dr. Sanjay K. Bais, Principal, Fabtech College of Pharmacy, Sangola congratulated him and wished all the best for future.

### Dr. Yogesh B. Raut of Fabtech College of Pharmacy, Sangola Awarded by Research Excellence Award 2023

Dr. Yogesh B. Raut Professor, Department of Pharmaceutics in Fabtech College of Pharmacy, Sangola was recently awarded by Research Excellence Award 2023 which was presented by In Sc Institute of Scholars. He has presented a Research paper on “Formulation and Evaluation of Gabapentin Matrix Tablet Using Different Grades of Sodium Alginate”. This Research paper was published in World Journal of Pharmacy and Pharmaceutical Sciences.

Hon. Shri. Bhausaheb Rupnar Chairman, Fabtech Technical Campus, Sangola, Hon. Shri. Dr. Ameet Rupnar, Managing Director, Fabtech Technical Campus, Sangola, Hon. Shri. Dinesh Rupnar, Executive Director, Fabtech Technical Campus, Sangola and Hon. Shri. Dr. Sanjay Adate, Campus Director, Fabtech Technical Campus, Sangola, Prof. Dr. Sanjay K. Bais, Principal, Fabtech College of Pharmacy, Sangola congratulated him and wished all the best for future.

## Published Review Articles of 106 students of Fabtech College of Pharmacy, Sangola in International Journals

The 106 students studied in B. Pharm-IV; Sem-VII was published their Review articles in various International Journals especially in International Journal of Pharmacy and Herbal Technology.

Due this activity the resume of the students become a strong and also the students were aware about, how to prepare Research paper, review articles, requirements for publication of article in the national, international level journals.
