### **FROM CHAIRMAN'S DESK**

**Hon. Shri. Bhausaheb A. Rupnar**  
**Chairman**

I would like to congratulate and welcome our college's budding pharmacists to the world of a rewarding career. I'm delighted to know that FES, Fabtech College of Pharmacy in Sangola, is releasing its Bimonthly Sixteenth Fabtech Pharma Newsletter. Undoubtedly, the college newsletter will contribute in the promotion of the college's multiple activities. It acts as a showcase for the faculty's achievements and successes in the classroom. This strengthens the documentation culture at the institute. It also facilitates the development of teamwork, which is essential in today's competitive global environment. I hope that this tradition of sending out newsletters continues indefinitely. We educate in a unique and creative way, and our students learn in a unique and creative way. Today's pupils have a strong knowledge base and adaptability. I am confident that this will keep the pupils updated about the advancements and challenges they will encounter in the near future. This has been a watershed moment for our programme, and we are grateful for your continued support and efforts on behalf of our students. I wish all the best to the incoming Fabtech College of Pharmacy, Sangola. Pharmacists who are ready to make their mark in the pharmacy profession.

**FROM MANAGING DIRECTOR'S DESK**

**Hon. Dr. Ameet B. Rupnar**  
Managing Director

I'd like to express my gratitude to Fabtech College of Pharmacy for producing this Sixteenth Fabtech Pharma newsletter. Beyond academics, it has made a name for itself among Pharmacy Colleges in the community by hosting, participating in, and organising seminars, workshops, placement exercises, health awareness campaigns, and blood donation camps, among other things. The efforts of good administration, dedicated teaching faculty, quality students, and a broad foundation of sophisticated instruments, an enlarged library, and an educationally supportive environment are undoubtedly responsible for this accomplishment. It serves as a showcase for the faculty's accomplishments and accomplishments in the classroom. This improves the institute's documentation culture. I warmly welcome you to explore this Fabtech Pharma Newsletter and make a visit to our college campus to get a feel of our vibrant academic atmosphere.

**FROM CAMPUS DIRECTOR'S DESK**

**Hon. Dr. Sanjay N. Adate**  
Campus Director

I'd like to congratulate Fabtech College of Pharmacy, Sangola on this Sixteenth Bimonthly Fabtech Pharma Newsletter work, theory, practical, seminar presentations, and research projects are all part of the Pharmacy curriculum. Aside from academics, students are also involved in cultural and sporting activities, as well as different competitions and social activities. I am delighted to present the Fourteenth Bimonthly Fabtech Pharma Newsletter, and best wishes for the newsletter's continued success.

**FROM PRINCIPAL'S DESK**

**Prof. Dr. S.K. Bais**  
Principal

The News Letter is a source of great pride and satisfaction for FES, Fabtech College of Pharmacy, Sangola. The College has made significant success in all academic and non-academic areas, as well as capacity building for staff and students. I am confident that this edition of Fabtech Pharma Newsletter will send a positive message to staff, students, and others interested in technical education and technology-based activities. A News Letter is similar to a mirror in that it displays a clear picture of all of a college's activities and helps students and teaching faculty strengthen their writing skills. I appreciate the Editorial Board of this News Letter for their hard work and efforts in completing the work in record time. Also, please accept my deepest congratulations to the staff and students for their successful efforts with Best Wishes.

**EDITORIAL TEAM**

**FROM EDITORS DESK**

The editorial team has the honour of releasing the Sixteenth FES Fabtech College of Pharmacy, Sangola, Fabtech Pharma Newsletter. A newsletter, as we all know, reflects a college's vision and objectives. It also highlights upcoming events, activities, and academic progress. We express our heartfelt gratitude to our management and principal for their great support, as well as their permission to publish the newsletter. Many more people, including students, are encouraged to use this newsletter as a platform to exhibit their ideas.

## LEADING ARTICLE

### World Patient Safety Day-2024

#### Introduction

The issue of patient safety is stark with estimates suggesting that as many as 1 in 10 patients in developed countries are harmed while receiving hospital care. The burden of unsafe care is disproportionately high in LMICs. Estimates show 134 million adverse events in LMIC hospitals every year, contributing to 2.6 million deaths. These alarming figures underscore the urgent need for robust safety measures across all healthcare settings. Every step in the process of care-giving is associated with a certain degree of inherent unsafety. Patient Safety focuses on minimizing risks, errors, and harm to patients during the provision of healthcare services. It is a fundamental principle of healthcare and is now being recognized as a large and growing global public health challenge. By focusing on patient safety, healthcare systems can not only prevent harm but also improve the overall quality of care, leading to better health outcomes and increased trust in the healthcare system. In order to ensure quality of care and patient safety a coordinated effort across all levels of healthcare is required. It involves adherence to standards, ongoing education and training for healthcare providers, and active involvement of patients in their own care. By concentrating on these areas, healthcare organizations can ensure that they meet the needs of patients while minimizing the risk of harm. There is a worldwide shift towards patient-centered healthcare, where the needs, preferences, and values of patients are central to care delivery. Many countries have implemented shared decision-making models, empowering patients to be active participants in their own care.

The Seventy Second World Health Assembly (WHA), vide it's resolution WHA 72.6 in May 2019, brought attention to the issue of patient safety and endorsed the creation of an annual World Patient Safety Day, to be observed globally on 17 September. World Health Assembly (WHA) also called for the development of a global patient safety action plan. This plan was subsequently adopted by the Seventy-Fourth World Health Assembly in 2021, with the vision of achieving "a world in which no one is harmed in healthcare, and every patient receives safe and respectful care, every time, everywhere." Global Patient Safety Action Plan 2021–2030, provides a strategic direction for concrete actions to be taken by countries, partner organizations and health care facilities. Initiatives of Government of India aligning with global efforts, has

made significant strides in advancing patient safety as part of its broader commitment to achieving Universal Health Coverage (UHC). The country has undertaken numerous efforts at national and state levels to address diverse patient safety challenges, including unsafe injection practices, health care associated infections, medication safety, and the growing threat of antimicrobial resistance. These efforts are complemented by the establishment of frameworks and standards that promote safe, effective, and patient-centered care. Yearly celebration of World Patient Safety Day serves as a vital reminder of the need to prioritize patient safety within healthcare systems and highlights the pressing challenges and opportunities for improving the quality of care. The observance of this day aims to foster a culture of safety within healthcare organizations, where errors are minimized, patient care is continuously improved, and the voices of patients and families are heard and valued. The theme of World Patient Safety Day 2024, "Improving Diagnosis for Patient Safety," with the slogan "Get it right, Make it safe," underscores the critical importance of accurate and timely diagnosis in ensuring patient safety. Diagnostic errors, which are often under recognized and inadequately addressed, pose a significant risk to patient outcomes, contributing to delays in treatment, unnecessary procedures, and preventable harm. This year's theme highlights the need for systematic improvements in diagnostic processes to enhance the overall safety and quality of healthcare.

## **Objectives of World Patient Safety Day 2024**

### **Raise Global Awareness**

Highlight the impact of diagnostic errors on patient harm and emphasize the critical role of accurate, timely, and safe diagnoses in enhancing patient safety.

### **Promote Diagnostic Safety**

Integrate diagnostic safety into patient safety policies and clinical practices at all levels of health care, in alignment with the Global Patient Safety Action Plan 2021–2030.

### **Foster Collaboration**

Encourage cooperation among policymakers, health care leaders, health workers, patient organizations, and other stakeholders to advance accurate, timely, and safe diagnoses.

### **Empower Patients and Families**

Enable patients and their families to actively engage with health workers and health care leaders to improve diagnostic processes.

## **Diagnostic safety plays a crucial role in patient safety for several reasons:**

### **Correct treatment**

An accurate diagnosis is crucial to determine the correct treatment. An incorrect or delayed diagnosis can result in the patient not receiving the necessary medical care, which can lead to further health problems or complications. Unnecessary treatment or the prescription of medication that is not necessary can pose significant health risks.

### **Early detection of diseases**

An accurate diagnosis enables early detection of diseases. This can help treat serious health problems at an early stage, which improves the chances of recovery and can reduce healthcare costs.

### **Resource efficiency**

An accurate diagnosis helps to use resources more efficiently. Medical resources such as time, personnel, equipment and financial resources can be used more effectively when the diagnosis is certain and accurate.

### **Trust**

A reliable diagnosis helps maintain patients' trust in the healthcare system and healthcare professionals. A loss of trust can lead to uncertainty, dissatisfaction and poorer compliance with medical instructions.

## **Patient participation**

When patients understand that their diagnosis is correct, they are more willing to actively participate in their own healthcare. This includes adhering to treatment plans, implementing lifestyle changes and collaborating with the treatment team.

Overall, a secure diagnosis goes a long way in ensuring that patients receive the best possible care and treatment, which ultimately improves their safety and well-being.

## **Pharmacist Role in Patient Safety**

Medication errors are highly pervasive across all settings of care, with the Food and Drug Administration (FDA) receiving more than 100,000 reports each year of suspected medication error. Medication error is a broad term used to describe a number of more specific events that may cause, or lead to, inappropriate medication uses or patient harm. These include patient receipt of the incorrect prescription (e.g., receiving the wrong drug or the correct drug but at the wrong dosage), harmful drug-to-drug interactions, errors in the drug preparation or delivery, and inappropriate or overprescribing of opioids. While the occurrence of an adverse drug event (ADE) is not always the result of medication error, it is cause of preventable adverse drug events. Preventable ADEs result from a medication error reaching the patient and causing any degree of harm, and it is estimated that around half of all ADEs are preventable.

Ensuring the safe prescribing and dispensing of medication to patients is a core function of a pharmacist. Pharmacists ensure that patients not only get the correct medication and dosing, but that they have the guidance they need to use the medication safely and effectively. However, as healthcare providers with expertise and focus on medications, there is an opportunity for the pharmacist to expand their role as patient safety leaders, working with patients and other providers to improve patient care outcomes and prevent medication errors. While traditionally pharmacists have been perceived as “behind the glass” dispensing medications, in the changing healthcare landscape they are increasingly seen as critical partners in the multi-disciplinary care team addressing complex patient needs. Particularly in response to the opioid crisis, there are some clear opportunities for hospital and community pharmacists to assume a greater role in pressing patient safety issues, such as appropriate opioid use, access to medications, medication adherence, readmission reductions, and medication safety.

In 2019, several studies were published on PSNet describing patient safety interventions incorporating pharmacists and highlighting several different ways the role of the pharmacist is changing to prevent medication errors and improve patient safety outcomes. This Annual Perspective will examine the evolving role of the pharmacist as a champion of patient safety.

The role of pharmacists in patient safety is essential and encompasses a variety of responsibilities aimed at ensuring the safe and effective use of medications. Here are several key aspects of their role:

### **Medication Management**

#### **Review and Verification**

Pharmacists assess and verify prescriptions for accuracy, appropriateness, and potential drug interactions before medications are dispensed.

#### **Therapeutic Drug Monitoring**

They monitor patients' medication regimens for efficacy and safety, adjusting dosages as necessary based on therapeutic outcomes and side effects.

#### **Patient Education and Counselling**

#### **Information Dissemination**

Pharmacists provide patients with essential information about their medications, including proper usage, potential side effects, and what to do in case of missed doses.

#### **Adherence Support**

By educating patients on the importance of adherence and addressing barriers to compliance, pharmacists help improve health outcomes and reduce the risk of medication errors.

## Medication Reconciliation

### Transition of Care

Pharmacists play a crucial role during transitions of care (e.g., hospital admission and discharge) by ensuring accurate medication histories and reconciling discrepancies to prevent adverse drug events.

### Identification of Drug Interactions and Allergies

#### Risk Assessment

Pharmacists are trained to identify potential drug-drug interactions, contraindications, and allergies, helping to prevent adverse reactions before they occur.

### Collaboration with Healthcare Teams

#### Interdisciplinary Collaboration

Pharmacists work closely with physicians, nurses, and other healthcare professionals to develop comprehensive treatment plans that prioritize patient safety and optimize therapeutic outcomes.

### Participation in Quality Improvement Initiatives

#### Safety Protocols

Pharmacists contribute to the development and implementation of medication safety protocols and quality improvement initiatives within healthcare settings.

#### Reporting and Analysis

They participate in reporting medication errors and adverse events, analyzing data to identify trends and implement corrective actions.

### Chronic Disease Management

#### Patient Monitoring

Pharmacists often manage chronic diseases (e.g., diabetes, hypertension) by monitoring medication regimens and providing ongoing support to optimize patient outcomes and safety.

### Public Health and Preventive Care

#### Vaccination and Screening

Many pharmacists are involved in public health initiatives, such as immunizations and health screenings, which play a vital role in preventing disease and promoting overall patient safety.

## Pharmacists' Actions to Improve Patient Safety and the Potential Impact

As health care providers, pharmacists take an oath that reads, in part, “I will apply my knowledge, experience, and skills to the best of my ability to assure optimal outcomes for my patients.”<sup>1</sup> Optimal outcomes include the safe use of medications resulting in the desired benefit to the patient’s health. While there are many actions that pharmacists can take to fulfill this oath and contribute to optimal outcomes, this publication highlights eight specific pharmacist actions that improve patient safety within the health care system. These eight actions are routinely taken by pharmacists in daily practice across patient care settings. The actions were compiled by an expert panel of pharmacist leaders

and other contributors from a variety of patient care settings. The actions are not listed in any specific order. For each action, example scenarios are provided to illustrate how pharmacists address specific patient care issues through their actions and the outcomes and the impact those actions have on patient safety.

## Pharmacists contribute to improved patient safety by:

### Ensuring medication access

Making sure patients can afford their medications and get the medications they need.

### Supplying medication information

Sharing information with patients and their caregivers so they can take medications safely and effectively.

### Evaluating medication appropriateness

Assessing each medication to be sure that the medication treatment is the most appropriate, effective, and safe choice for the individual patient.

### Improving medication adherence

Helping patients take medications as prescribed by their health care providers.

### Providing health and wellness services

Delivering needed patient care services designed to improve the health of patients.

### Performing medication management services

Comprehensively reviewing all of a patient's medications, ensuring that they will work together without avoidable problems, and developing an effective, well-designed treatment plan for the treatment or prevention of disease.

### Assessing patients' health status

Determining the current status of a patient to provide treatment guidance and assess the effectiveness of medication therapy.

### Coordinating care transitions:

Assisting with care coordination and medication management coordination for patients as they transition from one care setting to another.

## Patient safety: everyone has a role

### Healthcare professionals and the general public

The UK's national system for reporting safety information on medicinal products is the 'Yellow Card' Scheme ([www.mhra.gov.uk/yellowcard](http://www.mhra.gov.uk/yellowcard)), which is operated by the Medicines and Healthcare products Regulatory Agency (MHRA) and the Commission on Human Medicines (CHM). The scheme is used to collect information from both healthcare professionals (HCPs) and the general public on suspected adverse drug reactions (ADRs) to a medicine. Its continued success depends on the willingness of people to report suspected ADRs, as the scheme is voluntary. HCPs in particular may have direct interactions with the pharmaceutical industry involving patient safety. For example, data on the incidence and management of ADRs may be requested from the company's medical information service to help manage a particular patient with that ADR; HCPs may participate in market research, post-marketing clinical studies or patient support programmes; HCPs may work with the company to give presentations on specific therapeutic areas, enhanced by patient case stories, which often involve tolerability issues. There

are many opportunities for such interactions and any time a patient is mentioned who has experienced an adverse event to the company's medicinal products; the company is obliged to collect data about the patient's experience. Equally, assistance may be required to implement advice received on minimising risks to patients through updated product information, 'Dear HCP letter' or other materials, which are issued following agreement between pharmaceutical companies and the regulatory authorities.

### **Pharmaceutical companies**

The company that holds the marketing authorisation (licence) for a medicine has mandatory legal obligations to continuously collect data about safety and adverse events reported in association with its products. The company must have rigorous systems in place to collect safety data from any activity it undertakes that involves the use of its medicines by patients. All employees and contractors within the company must be trained on these processes to ensure safety data is reported in a timely manner. The company must collate and analyse the data to produce individual and cumulative safety reports and conduct pharmacovigilance activities such as signal detection

and risk management. Safety reports have to be transmitted to the regulatory authorities within defined timelines and any emerging concern about the benefit-risk balance of the product has to be notified immediately. If necessary, the authorities may request further investigations, including formal studies. Regulatory procedures exist for updating product information and implementing other safety measures. Companies are subject to inspections by the authorities of their pharmacovigilance systems.

### **Regulatory authorities**

Within Europe, pharmacovigilance activities are carried out collectively by the governmental regulatory authorities within the individual Member States, together with the European Commission and the European Medicines Agency (EMA). Safety data from a variety of sources is received and reviewed. This includes data from individual patient experiences, results from clinical and epidemiological studies and published reports in the scientific literature etc. Data is received from pharmaceutical companies, academic units, individual HCPs or patients. The EMA has established the Pharmacovigilance Risk Assessment Committee (PRAC), which meets once a month to provide recommendations on all aspects of pharmacovigilance, ranging from risk management and communications on the risks of adverse reactions, to the design and evaluation of post-licensing safety studies and pharmacovigilance audits. Scientific networks are also developed by the authorities to improve the public health effectiveness of pharmacovigilance activities.

In conclusion, the role of pharmacists in patient safety is multifaceted and critical to the overall healthcare system. As medication experts, pharmacists are uniquely positioned to identify potential drug interactions, ensure proper medication management, and educate patients about their therapies. By actively participating in interdisciplinary healthcare teams, pharmacists contribute to the development of safety protocols and the implementation of best practices that minimize medication errors.

Furthermore, their involvement in medication reconciliation, patient counseling, and monitoring of therapeutic outcomes enhances patient adherence and fosters a culture of safety. By advocating for patients and collaborating with other healthcare professionals, pharmacists help to create a safer healthcare environment.

## ACADEMIC ACTIVITIES

### Overall syllabus completion and attendance of B. Pharm-II year, Sem-III Students

The Overall 50% Syllabus of Theory and Practical subjects like Pharmaceutical Organic Chemistry-II, Physical Pharmaceutics-I, Pharmaceutical Microbiology, Pharmaceutical Engineering of B. Pharm-II, Sem-III, was completed by the faculty members with 85% attendance of students for the Theory classes and Practical.

### Conducted First Sessional Theory and Practical Examination of B. Pharm -II Year, Sem-III

As per Time-Table given by Dr. Babasaheb Ambedkar Technological University, Lonere. The Fabtech College of Pharmacy, Sangola was conducted the First sessional Theory and Practical examination from 02/09/2024 to 06/09/2024.

### Overall syllabus completion and attendance of B. Pharm-III year, Sem-V Students

The Overall 50% Syllabus of Theory and Practical subjects like Medicinal Chemistry -II, Industrial Pharmacy-I, Pharmacognosy and Phytochemistry-II, Pharmaceutical Jurisprudence of B. Pharm-III, Sem-V, was completed by the faculty members with 80% attendance of students for the Theory classes and Practical.

### Conducted First Sessional Theory and Practical Examination of B. Pharm -III Year, Sem-V

As per Time-Table given by Dr. Babasaheb Ambedkar Technological University, Lonere. The Fabtech College of Pharmacy, Sangola was conducted the First sessional Theory

and Practical examination from 02/09/2024 to 06/09/2024.

### Overall syllabus completion and attendance of B. Pharm-IV year, Sem-VII Students

The Overall 50% Syllabus of Theory and Practical subjects like Instrumental Methods of Analysis, Industrial Pharmacy-II, Pharmacy Practice, Novel Drug Delivery System of B. Pharm-IV, Sem-VII, was completed by the faculty members with 80%.

### Conducted First Sessional Theory and Practical Examination of B. Pharm -IV Year, Sem-VII

As per Time-Table given by Dr. Babasaheb Ambedkar Technological University, Lonere. The Fabtech College of Pharmacy, Sangola was conducted the First sessional Theory and Practical examination from 02/09/2024 to 06/09/2024.

## Overall syllabus completion and attendance of D. Pharm-II year Students

The Overall 60% Syllabus of Theory and Practical subjects like Pharmacology, Biochemistry, Community Pharmacy and Management, Pharmacy law and Ethics, Hospital and Clinical Pharmacy and Pharmacotherapeutics of D. Pharm-II year, was completed by the faculty members with 80% attendance of students for the Theory classes and Practical.

## Conducted First Sessional Theory and Practical Examination of D. Pharm -II Year, Students

As per dates given in the Academic calendar provided by MSBTE, Mumbai, The Fabtech College of Pharmacy, Sangola was conducted the Second Sessional Theory and Practical examination from 08/01/2024 to 20/01/2024.

## Overall syllabus completion and attendance of B. Pharm-II year, Sem-III Students

The Overall 100% Syllabus of Theory and Practical subjects like Pharmaceutical Organic Chemistry-II, Physical Pharmaceutics-I, Pharmaceutical Microbiology, Pharmaceutical Engineering of B. Pharm-II, Sem-III, was completed by the faculty members with 85% attendance of students for the Theory classes and Practical.

## Conducted Second Sessional Theory and Practical Examination of B. Pharm -II Year, Sem-III

As per Time-Table given by Dr. Babasaheb Ambedkar Technological University, Lonere. The Fabtech College of Pharmacy, Sangola was conducted the Second sessional Theory and Practical examination from 21/10/2024 to 26/10/2024.

## Overall syllabus completion and attendance of B. Pharm-III year, Sem-V Students

The Overall 100% Syllabus of Theory and Practical subjects like Medicinal Chemistry -II, Industrial Pharmacy-I, Pharmacology-II, Pharmacognosy and Phytochemistry-II, Pharmaceutical Jurisprudence of B. Pharm-III, Sem-V, was completed by the faculty members with 80% attendance of students for the Theory classes and Practical.

## Conducted Second Sessional Theory and Practical Examination of B. Pharm -III Year, Sem-V

As per Time-Table given by Dr. Babasaheb Ambedkar Technological University, Lonere. The Fabtech College of Pharmacy, Sangola was conducted the Second sessional Theory and Practical examination from 21/10/2024 to 26/10/2024.
